Status in UK

Resident Breeder

Passage/Winter visitor

RINGING DETAILS

Ringing scheme:	UK & Ireland
Age:	Nestling
Ringing date:	31 May 1974
Place:	Aberchirder, Aberdeenshire
Coordinates:	57°33'N, 2°238'W
Grid Reference:	NJ6253

FINDING DETAILS

The bird was recaptured by a ringer on 26 October 1975, 187km away in the Cousland area, Midlothian.

It was last found, having recently died, over 11 years later on 12 April 1987 in Iceland. An interesting location as they are more likely found in Scandinavia.

At 12 years, 10 months and 12 days, this Long-eared owl holds the longevity record for its species!
